

OLD AND NEW -- America's fifth nuclear-powered aircraft carrier, the Theodore Roosevelt, is draped with red, white and blue bunting during launching ceremonies at the Newport News (Virginia) Shipbuilding and Drydock Company. The 333-meter-long ship will accomodate nearly 100 aircraft and a crew of 6,200 after it is commissioned into the U.S. Navy in 1986. It is named for the 26th President of the United States. In left foreground is a replica of the Godspeed, one of three ships which brought the first permanent English settlers to nearby Jamestown, Virginia in 1607. (84-3225-C) C1585F1
