COMMUNITY OF THINKERS

The small town of Princeton, New Jersey, is probably the most important intellectual community in the United States. Not only is Princeton University located there but also the famous Institute for Advanced Study where scholars and scientists from all over the world come to think, to study, to research, to develop a new theory or disprove an old one, or perhaps to write a paper or a book. The intellectual climate of the town permits them to work without distraction.

3-14 Professor Lyman Spitzer of the Princeton Observatory shares some of his leisure time with his daughter, Lottie. (58-14207) C1352473

58-14207.- Archivado en UNIVERSITY;
