Picture Story No. 725

CENTENNIAL OF THE LAND GRANT

One hundred years ago, the United States Congress passed the Land-Grant Act, giving birth to a vast system of colleges and universities that would be "open and accessible to the poorest boy (or girl) in the land." Shown in these pictures is Cornell University, one of the sixty-eight land-grant institutions that have contributed much to education, not only in the United States but also in many other countries.

6-19 (To be used with 7-19) Home economics, which began humbly with courses in cooking and sewing, has branched out into courses that prepare women for several professional careers, including education. Here, an undergraduate observes an experimental nursery school through a one-way glass panel. She can see the children, but they cannot see her. (62-3033) (C135425)
