

X-WING DEMONSTRATOR -- The X-Wing Rotor Systems Research Aircraft makes its first public appearance during roll-out at the Sikorsky Aircraft plant in Stratford, Connecticut. The X-Wing design combines the hover efficiency of a helicopter with the high speed of a fixed-wing aircraft by using a rotor that can be stopped in flight for use as a wing. Sikorsky is developing the aircraft for the Defense Advanced Research Projects Agency and the National Aeronautics and Space Administration. (86-1753-C)
