

Picture Story No. 983

PICTURES ON MARS: U.S. SPACE TRIUMPH

12-13 One of the clearest photographs was shot from 12,480 kilometers. The pictures indicate that at least a large portion of Mars has even more and larger craters than the Moon, and that some appear to be rimmed by frost. As planned, the distance between Mariner and Mars was too great for the camera to detect any evidence of life. (65-3027)
