SPACELAB 3 CREW & INSIGNIA -- Crew patch for Space Shuttle mission 51-B features the orbiter Challenger with the Spacelab 3 scientific module in the open cargo bay. The seven stars of the constellation Pegasus surround the orbiter above the flag-draped Earth. Circling the scene are names of crewmembers Don Lind, Norman Thagard, Robert Overmyer, Frederick Gregory, William Thornton, Lodewijk van den Berg and Taylor Wang. Posed inside the Spacelab simulator are (seated, from left) Robert Overmyer, crew commander, and Frederick Gregory, pilot; (standing, from left) Don Lind, Taylor Wang, Norman Thagard, William Thornton and Lodewijk van den Berg. Drs. Wang and van den Berg are payload specialists. The others are mission specialists. The flight is scheduled for launch from Florida on April 29, 1985. (85-1027-C)
