This photograph is a government publication--not subject to copyright.
It may not be used to state or imply the endorsement by NASA or by any NASA employee of a commercial product, process or service, or used in any other manner that might mislead. Accordingly, it is requested that if this photograph is used in advertising, and other commercial promotion, layout and copy be submitted to NASA prior to release.

The deployment of the Early Apollo Scientific Experiments Package is photographed by Astronaut Neil A. Armstrong during the Apollo 11 EVA. Here, Astronaut Aldrin is deploying the Passive Seismic Experiments Package (PSEP). Already deployed is the Laser Ranging Retro-Reflector (LR-3), which can be seen to the left and further in the background. In the center background is the Lunar Module. A flag of the United States is deployed near the LM. In the far left background is the deployed black and white lunar surface television camera. Armstrong took this picture with the 70mm lunar surface camera, also.
