

## COLECCIÓN FOTOS EMBAJADA EE.UU.

Lunar Module Pilot, Edgar D. Mitchell, of the Apollo 14 landing mission, is shown in lunar surface simulation training at the Kennedy Space Center. He is attached to a Six Degrees of Freedom Simulator, a sling that reduces his weight to what it will be on the moon, as he descends a ramp similar in steepness to craters in the Fra Mauro landing site area. PHOTO FROM IPS 70-2664 (same as SCI-3461).
