

APOLLO- 15 MOON BUGGY -- The crewmen for the Apollo-15 flight, scheduled for launching from Florida on July 25, check out the roving vehicle they plan to use for extended exploration and sample collection in the Hadley Rille highlands of the Moon. At the Manned Spacecraft Center in Houston, Texas are, from left: James Irwin and David Scott, who will make the landing, and Alfred Worden, who will remain in the command ship in lunar orbit. The battery-driven vehicle is about three meters long and has a top speed of about 13 kilometers per hour.
