

ONE OF TEN -- Engineer Delores Brown, 26, tests circuits for the control system of a U.S. communication satellite. She is one of 10 children helped through college by their parents, William and Mary Robinson, who own a farm in Florida. Mrs. Brown was the top graduate in 1967 from the school of engineering of Tuskegee Institute in Alabama. She has been assigned to work on a flight control system for the Space Shuttle, the reusable manned craft under development to put payload to Earth orbit in the 1980s. (73-2594)
