

## STATE OF TENNESSEE

Criss-crossed by the once destructive Tennessee River, the state has been brought to a high economic plane by the development of the Tennessee Valley Authority (TVA). Once mainly an agricultural state, Tennessee is now strong industrially with manufacturing payrolls twice the size of farm income. TVA has also helped to develop some of the most beautiful state recreational areas in the United States. Tennessee has 53 institutions of higher learning, including 28 colleges and universities.
