

FIRST PHOTO OF EARTH FROM THE MOON -- This first photograph of Earth (left) taken from the vicinity of the Moon was made August 23 by Lunar Orbiter-1. The picture was received two days later at the deep space tracking station at Robledo de Chavela, near Madrid, Spain. At right is a portion of the lunar surface. Horizontal lines mark edges of framelets or strips of the picture as they were transmitted back to Earth. The picture was made with the satellite's medium resolution camera. CR375 (66-2366)
