Navy P2V-7 "Neptune" patrol bomber readies to take on fuel for its two reciprocating and two jet engines, at the U.S. Naval Air Station, Rota, Spain. The "Neptune", based at the Navy's Port Lyautey, Morocco, air station, spent a day at Rota making ~~observed~~ tests of the new air station's operating capabilities. "Neptunes" will be based at Rota in the future for maritime and anti-submarine patrolling.
