

Picture Story No. 736

TELSTAR BREAKS SPACE BARRIERS

On July 23, 1962, the first formal television exchange between Europe and the Western Hemisphere took place as the communications satellite, Telstar, transmitted a 20-minute show from each continent. There was no film used. All of the images were "live," of actual people, events and places. The combined television audience of 200 million persons could view each continent in detail with a feeling of closeness never before possible.

3-10 United Nations Headquarters in New York City, Howard K. Smith reporting, as it appeared on the television screen, transmitted by the communications satellite Telstar. (62-4513)
