

KURIL ISLANDS PHOTOGRAPHED BY TIROS I -- The Kuril Islands stretching from Kamchatka Peninsula to the northernmost Japanese Island of Hokkaido were recorded by the wide angle camera aboard Tiros I, the meteorological satellite launched by the United States April 1. This photograph was made April 4 during the satellite's 36th orbit. Areas identified are:
1) Hokkaido, 2) Kuril Islands, and 3) U.S.S.R. (60-5536)
