

CANYON VIEW -- Part of Valles Marineris, the so-called "Grand Canyon of Mars,"  
dominates this mosaic. The picture was constructed from 15 black-and-white  
photos taken through violet, green and red filters by the Viking-1 orbiter.  
North is to upper left. The canyon lies just a few degrees south of the  
equator and parallels it for some 5,000 kilometers. Area shown is about 1,800  
by 2,000 kilometers.
